

Quentin Lecler

SENIOR FULL-STACK DEVELOPER · AI-ASSISTED

Belgium · +32 497 91 86 64 · quentin@lecler.dev · linkedin.com/in/qlecler · github.com/quentinlecler · lecler.dev

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 9 years of experience, including 7 years building mission-critical SaaS for healthcare and finance in Luxembourg. AI-native workflow since 2025: daily agentic development with Claude Code — structured prompting, custom skills, MCP servers and project-wide AI guidelines — with every change verified test-first (TDD, PHPUnit, Playwright E2E) and gated by CI. Delivered CNS PID V2 healthcare payment integration, real-time EMR systems, and Benelux banking API platforms (Belfius, BNP Paribas Fortis, Cofidis, Elantis, DHB Bank) — with full ownership from frontend to backend and infrastructure. Expert in PHP, Laravel, Vue.js, React, TypeScript and Node.js. Strong track record designing and securing REST APIs and web services across regulated environments. 7+ years hands-on CI/CD experience — GitHub Actions, GitLab CI, Docker, automated testing pipelines (PHPUnit, Playwright E2E). Proven ability to architect, ship and maintain complex regulated systems independently. Native French speaker, professional fluency in English (C1).

PROFESSIONAL EXPERIENCE

Doctipro (MIP-IT SARL) July 2025 — July 2026

Full Stack Developer & Tech Lead — Healthcare SaaS

Healthcare SaaS — Clervaux, Luxembourg · On-site

- Architected and delivered ophthalmology SaaS integrated with Luxembourg national health system — CNS PID V2, CNS eCIT & LuxTrust
- Obtained eCIT labellisation and led full PID V2 + MHV2 eConnector SaaS implementation end-to-end
- Led technical architecture and code review gating — CI/CD via GitHub Actions, agile sprint tracking with GitHub Projects
- Designed the project's AI-assisted development workflow with Claude Code — 570-line AI guidelines (CLAUDE.md), 8 custom skills (security audit, Playwright E2E, deployment), MCP servers (MySQL, Context7, Laravel Boost) and an 80% test-coverage rule on all new code
- Identified and patched critical security vulnerabilities (RCE, IDOR, XSS) through defensive pentesting
- Designed DevOps infrastructure — Nginx reverse proxy and SupervisorD for Laravel Reverb process management
- Integrated ophthalmic medical devices (Nidek) via Node.js — serial protocol parsing, CIFS photo extraction, local WebSocket bridge to SaaS APIs

Stack: PHP, Laravel, MariaDB, Node.js, Express, WebSocket, REST APIs, OAuth2, CNS PID V2, CNS eCIT, LuxTrust, PHPUnit, Playwright E2E, GitHub Actions, Docker, Claude Code

Référenceur January 2024 — July 2025

Full Stack Developer — Financial SaaS

Financial SaaS — Weiswampach, Luxembourg · On-site

- Sole architect and developer of a white-label financial SaaS — mortgage & credit management with submission to external banking APIs
- Implemented full test coverage — Playwright E2E, feature and unit tests across the entire platform
- Adopted Claude Code in 2025 for AI-assisted development — test-first changes validated against the PHPUnit and Playwright E2E suites
- Built fully customizable white-label engine — per-broker domain, email, branding, loan simulators configurable without code
- Billing automation via Zoho API; CLIP payment gateway integration

Stack: PHP, Laravel, PostgreSQL, React, Vue.js, TypeScript, REST APIs, Zoho API, GitHub Actions, CI/CD

Anysoft Luxembourg April 2019 — January 2024

Full Stack Developer — Financial SaaS

Financial SaaS — Troisvierges, Luxembourg · On-site

- Led full migration of CLIP from legacy Windows desktop app to modern web-based SaaS — mortgage & consumer credit management, 100% solo
- Integrated five banking APIs — Belfius, BNP Paribas Fortis, Cofidis, Elantis, DHB Bank — over SOAP/XML, REST, TXT and proprietary data formats depending on the institution
- Node.js/Express and C# .NET Core API gateways — JWT-secured, bridging the React frontend to banking payment integrations and loan submission
- Identity verification with card reader — platform serving 200+ broker agencies across Benelux

Stack: React, TypeScript, Node.js, Express, JWT, .NET Core, C#, Sybase, REST APIs

E.S.I. Informatique June 2017 — April 2019

Full Stack Developer — Agri-food & Industry SaaS

Belgium · On-site

- Built Quality Control SaaS used by Vinçotte inspectors at Belgium's largest Carrefour distribution center — product quality standards for thousands of SKUs
- Developed companion mobile app (iOS & Android) for warehouse inspections — enabling Vinçotte staff to inspect product quality on-site
- Brunswick Marine client integration — web application development
- Full ownership of frontend, backend (PHP/Zend, Python/Django, Node.js/Express with Sequelize), database and mobile — incl. JWT-secured APIs for React modules, alongside one backend developer

Stack: PHP, Zend Framework, Python, Django, Node.js, Express, Sequelize, JWT, PostgreSQL, Angular.js, React, Ionic, Cordova, iOS, Android

SKILLS

Backend: PHP 7/8, Laravel, Node.js, Express, Sequelize, MariaDB, PostgreSQL, MySQL, Python, Django (2017–2019)

Frontend: Vue.js, React, TypeScript, JavaScript, Sass, Vite

Infrastructure: Docker, GitHub Actions, GitLab CI/CD, Nginx, OAuth2, Keycloak, REST APIs, Laravel Reverb

Testing & Quality: TDD, PHPUnit, Vitest, Playwright E2E, Integration testing

AI-Assisted Development: Claude Code (daily since 2025), agentic workflows, prompt engineering, custom skills, MCP servers, CLAUDE.md guidelines, TDD-guarded AI changes

Security: Application security, Pentesting (RCE, IDOR, XSS), CCNA, CyberOps training (Cisco NetAcad)

EDUCATION

Computer Science — Business Applications · IPEPS Verviers · 2016–2018

CyberOps Associate Training · Cisco Networking Academy · 2017–2018

CERTIFICATIONS

CCNA — Cisco Certified Network Associate · Cisco Networking Academy · 2016–2017

AVAILABILITY

Available immediately — full-time and freelance
